

ORDER ANNOUNCEMENT!

We are starting to take in new orders, but in a limited amount. This will be in place for at least the next few months. They will be limited in amount due to model and part shortages. Also we have suspend doing any new project with working lights and sirens due to part shortages.

If you are already on our list of projects, you're project will completed in a timely manner. We will only be taking a few orders at a time. There will be a waiting list for new and repeat customers that both would be put on. **There will be no guarantee your project will be taken on.**

We wish we could build every request we get in. We have made many friends building replicas over the years. For the new customers to the page, I am a one man show with a fulltime job. We have in the past tried to do every project but that isn't possible. So to balance everything this is the plan we have come up with.

We still will be giving quotes for projects as normal.

REPEAT CUSTOMERS:

We will make exceptions for repeat customers since they know our process. Repeat customers will be put at the top of the projects list. You will be given a tentative timeframe when you place your order.

ORDER PLACEMENT & PAYMENT:

Orders must be placed through our website. Once we take time to review your project you will be given a quote for the project. If the quote is accepted, you will have an invoice sent to a valid email address you provide. You will have **10 days** to make the payment or your order will be cancelled. We are doing this to insure people are committed to the project they are wanting. Also to insure time and materials aren't wasted on our end.

This is the best method we have come up with to be up front and honest to everyone. Thank you for the support, understanding and as always your business.
